Viewing Captions… in Windows Media Player – Version 10

To view captions (see example below) follow these instructions to set up your Windows Media Player. Next slide

Note, once you have completed this set-up, you must restart the video stream by closing Windows Media Player and then restarting. Upon restart, use the Ctrl+Shift+C command to show / hide captions.

More information is available on Microsoft's website. Go to Microsoft's Using Windows Media Player 10 website.

Next slide

As the holiday season approaches,
Step 1: Go to the Tools menu and select Options...
Step 2: Select Security tab

Step 3: Check Show local captions when present option.

Step 4: Click Apply box

Step 5: Click OK box.
Step 6: Under the Play menu, select Captions and Subtitles > English option. If the <English> option is not visible, change the Default to English. See more on changing default setting.

Step 7: Close and restart your Windows Media Player.

You should now see captions.

Tip… Use the shortcut of Ctrl+Shift+C to show / hide captions.
Change the default to **English** by clicking on the **Defaults...** option.
Select the **English (United States [en-us])** option from the Captions and subtitle: pull down menu.

Click **OK** button.
